Hi there,

Thank you as always for giving us great information. I will work on getting camera support tickets created for the cameras you mentioned and ensure their image quality is improved.

Once I hear back from the engineering team I will let you know.

Stay safe,
Chris

Subject: Multi-geo search fail on real case. Poor night time reads

Flock Safety,

Attached is documentation of the Multi-Geo search failing on a recent case and failing on known good data test.

Also, the following cameras are “washed out” on the night time images and are not capturing plates:

013, 037, 060, 061, 073, 074, 082, 091, 092, 095, 107, 116 and 129….so far.

Please schedule these for maintenance and continue working on the Multi -geo search feature.

Contact me if you need additional information.

Corporal Stephen L. Best
